

The Future of Voting **Participant Biography**

Richard Carback

University of Maryland, Baltimore County

Richard Carback is a graduate student at the University of Maryland, Baltimore County (UMBC) in the Department of Computer Science and Electrical Engineering (CSEE). He is a member of the team that implemented the Punchscan voting system, which won first place at the intercollegiate voting systems competition, VoComp, in 2007. He studies computer security topics with the Cyber Defense Lab at UMBC. His current research efforts focus on end-to-end voting systems, but he has broad interests in many areas of computer security.
